ABOUT

This is a website which has a collection of various movies and their information like rating, review and other details. It provides a great user experience and lets users know everything about the recent and old movies. It also lists the various cineplexes which showing the movie nearby.

TECHNOLOGY CHOICES

UI/UX : *We will use React.js for javascript side and bootstrap for CSS and HTML side to design Picture Perfect UI.*

DATABASE : *MySQL*

MySQL is a very commonly used relational database management system. We have to maintain a database of movies and their contents and need a structured relational database which is highly scalable and quick so MySQL is perfect for our purpose.

BACK END : *We will use go-lang to design back-end of the website as it is very reliable and efficient.*

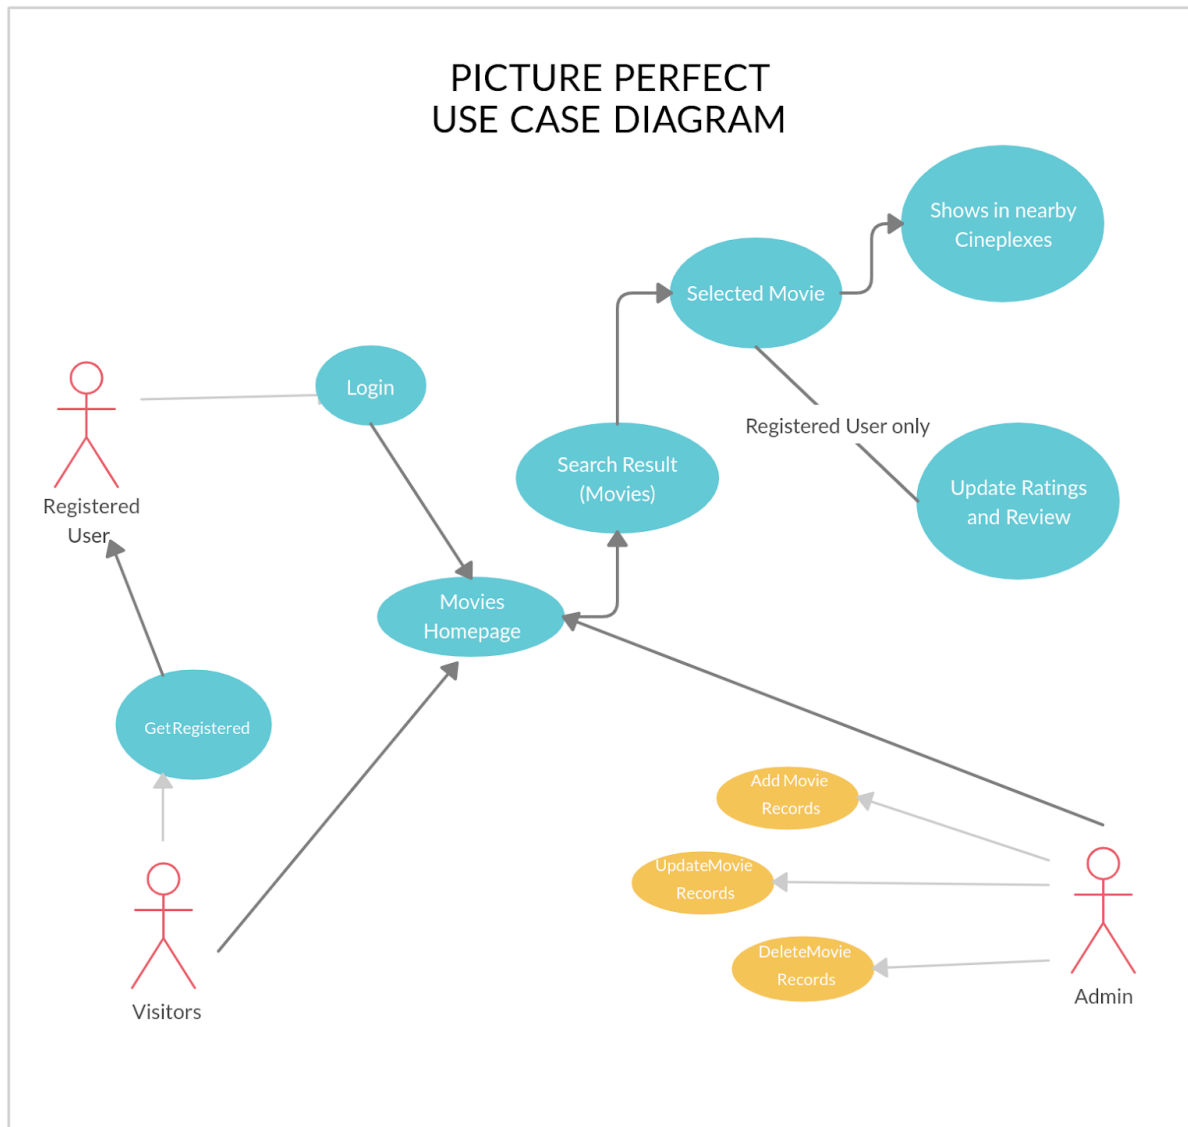

TESTING: *We will use Jenkins to test our system as it is a highly efficient open source automation server. We will take care of all corner cases and glitches occur during communication between various parts and services of the system.*

DEPLOYMENT: *We will use Amazon CodeDeploy for deployment purposes. It works with any platform, language, and application. AWS CodeDeploy makes it easier to rapidly release new features, helps avoid downtime during application deployment, and handles the complexity of updating applications.*

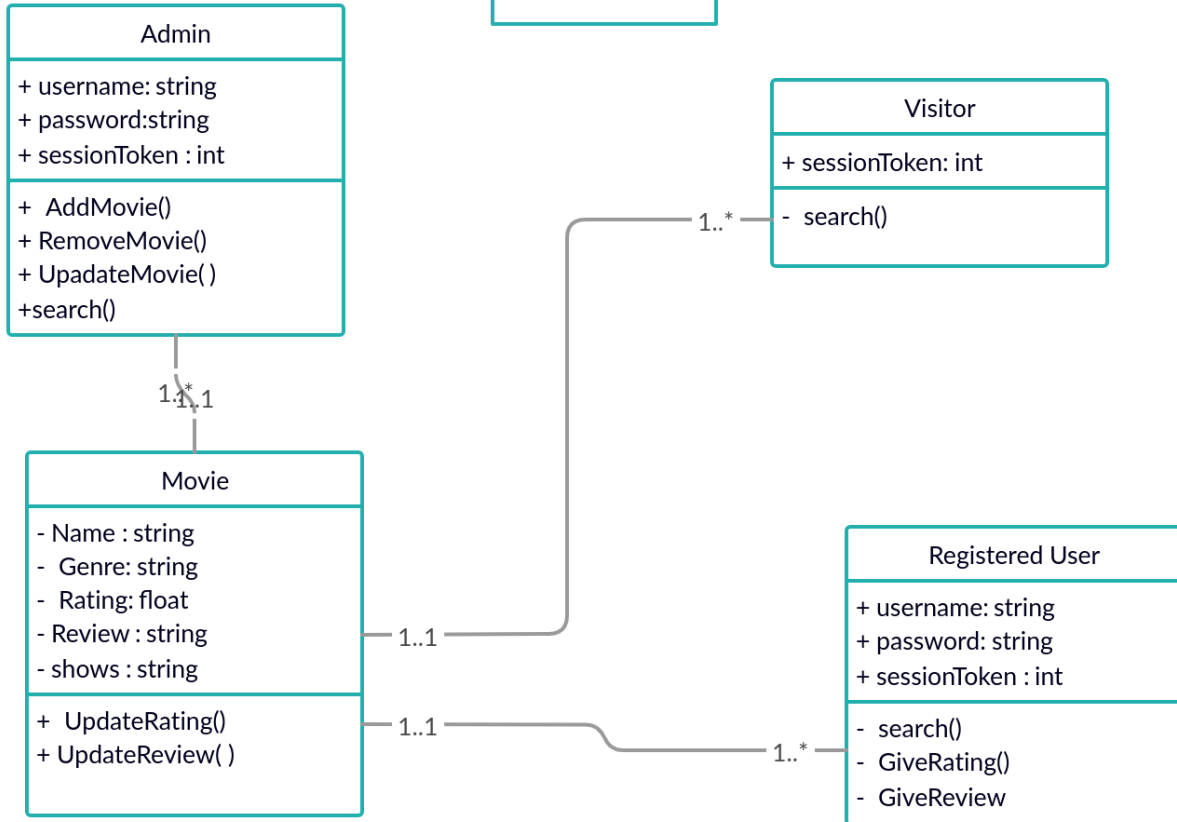

AWS SERVICES : *We will use AWS lambda , Amazon EC2 , Amazon RDS (MySQL) , AWS CloudFront , Amazon CloudSearch and Amazon S3*

TRAILER

REVIEWS

Truly a masterpiece, The Best Hollywood film of 2019, one of the Best films of the decade.. And truly the Best film to bring a comic book so chillingly and realistically to real life. Remarkable Direction, Cinematography, Music and the Acting. Some people are surprised to find it DISTURBING and VIOLENT, but it's a necessity and message
